FAST ACCURATE, WEIGHING AND RATING
Differential weighing and Smart Start technology help provide a simple mail processing experience with the IS-330. When using differential weighing, simply place mixed weight mail on the weighing platform, remove an envelope and the correct rate is calculated. With Smart Start technology, each time an envelope is removed from the weighing platform in differential mode, the powerfeeder starts and is ready to process mail.

Smooth, powerfeed provides fast batch processing

STAND OUT FROM THE REST
Personalize items and help promote your business with ad slogans, custom text messages, QR codes and company logos. The IS-330 always prints an IBI Lite indicia, optimizing ink yield and minimizing replenishment.

UNDERSTANDING RATES HAS NEVER BEEN EASIER
The Rate Wizard simplifies the process of selecting the correct postal rate and class for your items. With concise step-by-step instructions, the selection process has never been easier. Shortcut keys save time and eliminate keystrokes too. From single envelopes to larger packages, you have the flexibility to weigh and manage mail with ease.
